Design Overview for Swin Movies

Name: Pham Le Yen Chi

Student ID: 103430040

Summary of Program

Swin Movies is an Vue application with the basic backend of php and firebase, which used for watching movies, getting information about the movies and actors/actresses. User can register, login, sign out. With the admin account (admin@gmail.com), the admin page will be available to access in order to add/update/create data of movies and actors.

Describe the main functions:

- Listing the popular/trending movies
- Listing two types of movies: action and fiction movies
- Show information of movies and actors/actresses
- Register, Login, Sign out
- Search movies: users have to search the exact name of the movies
- Admin: create/update/delete movies and actors. (Go to user profile)
- User profile
